~~9/22/93~~
In October. Previously a chemistry student
had reported a sniffer which had
caught her password. She notified
FBI, is back & changed her password.
The two terminals 1 is as PC & 1 is a
Pack Windows.

~~Ingraham dated 9/22-24~~

~~states~~

NIST Natl Instit of Standards
& Tech

#6 File only no clear copy

TCP wrapper not up restricts login
might be access from previous user
entire life of sys.

a. Allowed resource.

If there are any suspicions or want any
deeper research let Harvard
know. Has a Unix Specialist
who can do it but at this
time there is no justification
in Harvard's eyes.

(13) Network rep if further research
is required. Lot of work if
there is no need. No identifiable
accounts

(12) None.

[] will be putting his final
Statement & TADR together & forward
to []

FL
First, 2703, provided on 10/2/88

Chen Dept. activity on a com that
~~2 unusual login~~
May have been compromised

When followed up by
activity was generated by
a professor, researcher & student
& dial up were local.
- Dudley Hirschbach group

All activity has led to an
explainable source. or outside
of time frame 10/2 - 10/13.
